

2-Stroke Glow to Electric Conversion Guide

This conversion guide will direct the user to the correct size Electric Motor, Speed Controller, Battery and Prop needed to emulate the performance of a 2-Stroke glow engine, when used in a Sport Flying type Model aircraft. This guide uses the recognized standard of 1 Cubic Inch of 2-Stroke glow engine power being equal to 2000 Watts of electric power. While there are many different power system combinations that will work, the ones shown in this guide will use props that are similar in size to their glow counterparts for prop clearance considerations.

.020 Glow Engine Power - 40 Watts																	
Cobra Power System						BadAss Power System						Tempest Power System					
Motor Cobra C-2203/28 - 2800Kv						Motor						Motor Tempest 1704-2600Kv
